3. Wiring

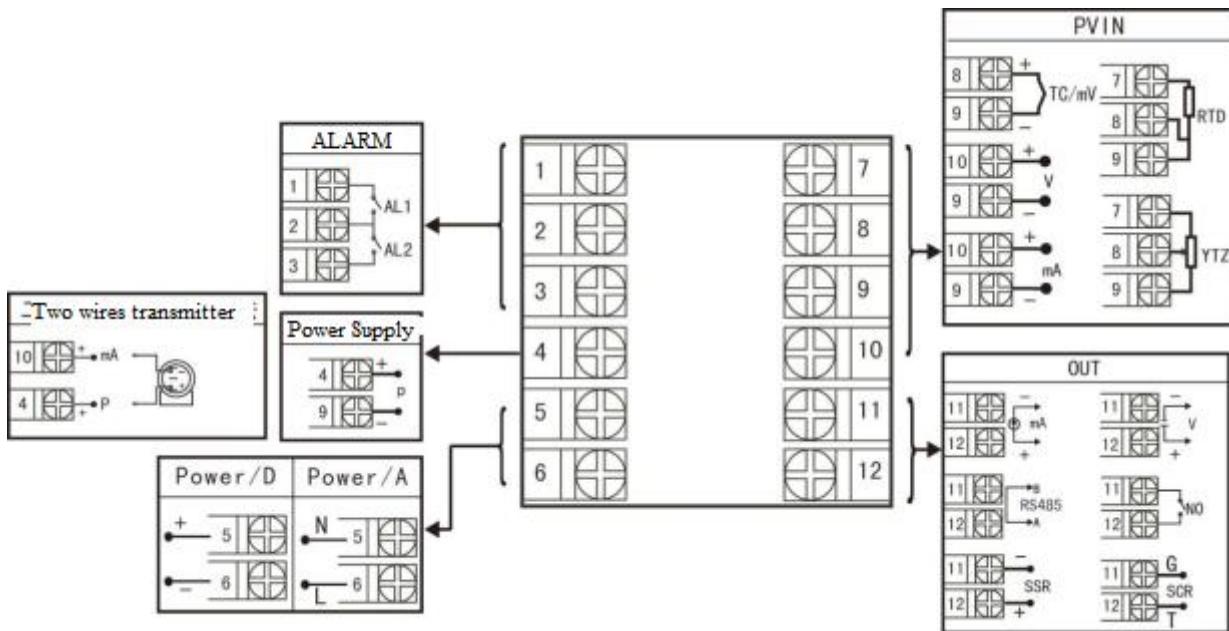

The dimensions are A, B, C, D and E wiring diagrams

Note: The direction of the terminal of the rear cover of the horizontal and vertical instrument is different. See diagram 1.

Diagram 1**A、D****B、E**

The dimension is F wiring diagram

The dimension is H wiring diagram

Note:

If different functions are marked on the same set of terminals in the wiring diagram above, only one of the functions can be selected. For example, the RS485 communication function and control output function are on the same set of OUT terminals, and only one can be selected. If both need to exist at the same time, the control output can only choose the output of switching quantity and the terminal is on AL2.
